Filters

Pinholes

- **Ideal for steering beams to a different optical centerline height**
- **Based on standard components**
- **Mirror mounts allow any type of coated mirror to be mounted**
- **Low cost version**

## Opto-mechanics

Breadboards & Rails

Mounting Hardware

Mirror & Component Mounts

Manual Micro Positioners

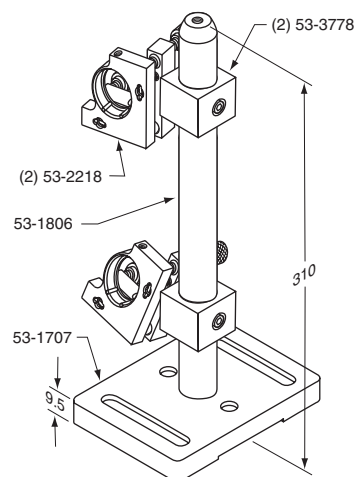

Motorized Positioners

This periscope is based on low cost standard components from our range of hardware and mirror mounts. This makes it extremely affordable and very flexible in its application.

The periscope utilizes two precise mirror mounts, a 300 mm half-inch post, wide post base and two general-purpose swivel clamps. The precise mirror mounts will accept any 25.4 mm diameter mirrors from our range of laser optics.

### 53-4099

Low Cost Periscope
