

# HANDHELD- MOTOR CONTROLLER

## KEY FEATURES:

- Open loop control for positioning up to two motors
- Output Voltage 12Vdc
- Powered by battery
- Two motion buttons for up and down movement
- Low battery usage

The Ealing Handheld Motor Controller has a 12V Motor output voltage and is compatible with Ealing Linear actuators such as #37-0015-000 and all other actuator on the market with the same connection.

Two ports, which can be used separately at the same time with two different buttons, allow the user to precisely position his different actuators.

## Specifications:

**Dimensions:** 89 mm x 165 mm x 36 mm

**Weight:** 0.3 kg

### Package Includes:

- 1 Handheld Motor Controller
- Power Supply (first order)

\*actuator solutions are available in a variety of configurations and not included with Handheld Motor Controller (e.g. 37-0015-000)
